Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. Statement**

Novelty (N)	Claims	1-26	YES
	Claims		NO
Inventive step (IS)	Claims	16-26	YES
	Claims	1-15	NO
Industrial applicability (IA)	Claims	1-26	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

The following documents have been considered for the purpose of this written opinion:

D1: JP 2002-133181 A

D2: KR 2000-72435 A

D3: US 2003-41004 A

D1 discloses an on-line auction system. A seller registers to exhibit an item or makes a bid for an item from a terminal. Information is provided including: an item's information, opening price, desired bid price, a possible condition, and a desired condition. The information is available to a server, and to a server of a mediator to the Internet network. The probability of successful bids for the exhibited items, as a service for a seller, is increased by this system.

D2 discloses a method for a real time-auction on a network. If a bidder wishes to make a reserved bid prior to the initiation of the auction, the reserved bid is stored in a date base.

Novelty:

The present invention relates to an on-line auction system wherein an item's price is constantly reduced according to a product's price inspection. A bid's result is noticed immediately because an auction progresses according to corresponding products, a new auction is generated continuously, and a participant who joins the auction can purchase a product in serial order.

Although D1 and D2 show the similar structure to that of the present invention, they are not the same completely. So, novelty of the claims 1-26 of the present invention can be acknowledged.

Supplemental Box

In case the space in any of the preceding boxes is not sufficient.

BOX V.

Inventive Step:

In view of an inventive step, the components of the present invention and those of D1 are similar.

And the components of Claims 5 and 6 of the present invention are similar to those of D2.

In addition, a technique regarding "a bid and auction service through on-line" described in D3 is similar to the present invention.

Therefore, claims 1-15 can be easily invented by a person skilled in the art through the combination of D1, D2 & D3.

In conclusion, claims 1-15 of the present invention lack an inventive step.

Industrial applicability

All claims are considered to be industrially applicable.
